International meeting for squats and autonomous spaces Kesselberg, Berlin 24th - 26th May 2008

Following on from the last international squats and autonomous spaces meeting in Dijon, France last November, comes the second meeting: this time on the outskirts of Berlin. We see this as a meeting not just to exchange tactics and ideas, or to reflect on the April Action Days (and plan new ones?) but to share in our new projects, fights and victories: *to redraw the battle lines*. To achieve durable exchange and solidarity on an international level.
